

Service Support

Achieve maximum quality and productivity from your processing equipment

Inspect your processing equipment often?

When was the last time you thoroughly inspected your magnetic, vibratory and metal detection equipment? Chances are it's been a while. Maybe equipment inspection isn't your top priority right now. Possibly you've downsized and don't have the maintenance staff you once did. Or maybe you do regular inspections, but some of the units are too specialized. Eriez can now assume this very important, but often overlooked task.

Calibration Service

This service provides a definitive report as to the status of existing magnet installations. The report can be used as a calibration certificate within any company's management and quality system. The service aims to identify whether magnets are of the correct design and strength, are correctly positioned and are in the right location within the plant to achieve the intended separation objective.

Preventive Maintenance Inspection Service

This service is available right now to help minimize equipment problems and pull maximum quality and productivity from your operation by providing regular equipment checks and detailed reports.

Checking your equipment on a regular basis will help:

- Maintain highest product quality
- Catch equipment problems before they occur
- Eliminate production line shutdowns caused by broken equipment
- Cope with reduced maintenance staff
- Meet or maintain ISO 9000 standards

Top to bottom. Front to back. We'll measure the field strength of the magnets in your production line. We check the sensitivity of your metal detector and the operation of your sampling system. We'll monitor test controls, timers, relays and other electronic components. We'll also check and restore oil levels in reducers,

Products Covered Under Eriez Service Support

Each piece of equipment gets thoroughly inspected at critical checkpoints. Then we issue a full report, noting any immediate service needs and highlighting areas that will need future attention.

A few of the products that Eriez will take care of:

Magnetic Separators

Suspended Magnets

Magnetic Filters

Magnetic Drums

Metal Detectors

Sampling Systems

Eddy Current Separators

Magnetic Chip and Parts Conveyors

Vibratory Feeders

Flexible Service Plans

Let us work out a plan to visit you on a regular basis.

We'll even accommodate scheduled shutdown periods to prevent disruptions to your operation.

Bonus: Extended warranty on select products

Sign up for the service and Eriez will extend for one year the warranty on the coils of all Eriez suspended electromagnets in your plant. We'll also guarantee the magnetic strength on every Eriez permanent magnet on your floor, including grates, plates and traps.

Questions?

So, when was the last time you had your equipment checked? Let's discuss a solution that's right for you. There's no obligation. Call Eriez on 029 2086 8501.
