

Eriez Magnet Calibration Service

Eriez Magnet Calibration Service provides each customer with a definitive report as to the status of existing magnet installations. The report can be used as a calibration certificate within any company's management and quality system.

The service inspects new and existing magnets with each piece of equipment thoroughly checked at critical points:

- To identify whether they are of the **correct design** and **strength**.
- To ensure they are **correctly positioned** and **installed**.
- To confirm they are in the right location within the plant to achieve the **intended separation objective**.

Checking your equipment on a regular basis will help:

- Maintain **highest product quality**
- Identify **potential equipment problems**
- Eliminate **production line shutdowns** caused by broken equipment
- Cope with **reduced maintenance staff**
- Meet or maintain ISO 9000 standards
